

Brandon Mole

In December of 2019, Brandon Mole graduated from Penn State University with a degree in Biochemistry & Molecular Biology. During his tenure at Penn State, Brandon was active on the wrestling team and made his mark on campus as a hard working student. Immediately following graduation, Brandon accepted a position with GlaxoSmithKline (GSK) as a Scientist. At GSK, he and his team work to manufacture a wide variety of medicines that are currently being tested in clinical trials. These medications are used to treat numerous conditions such as asthma, rheumatoid arthritis and cancer.

Brandon is delighted to be able to work and produce something that has the potential to positively impact the quality and longevity of people's lives. ■
